RAM 1500 TRX

A BEAST ON THE STREET

RAM 1500 TRX

0-100 in 4.5 seconds, the Ram 1500 TRX is a beast on the road. Coined as the most muscular pick-up truck from the factory, under the hood is the familiar 6.2L supercharged V8 that's shared along with the Dodge Hellcat badge. On top of 682bhp, the iconic engine makes 881Nm of torque.

The power has shifted with the Ram 1500 TRX. The TRX is the most powerful production street-legal half-tonne pick-up ever produced. This brilliantly engineered machine is a performance truck and an off-road truck, designed to keep you in command on any terrain.

COLOUR OPTIONS

INTERIOR

- Premium materials, superior refinement and the latest technologies

VOICE

APPLE CARPLAY

The smarter, safer way to use your iPhone inside your vehicle. Plug in to seamlessly integrate Uconnect. You can use the touchscreen or Siri to make calls, access Apple Music, send and receive messages, get directions optimised for traffic conditions and more while staying focused on the road.

ANDROID AUTO

This plug-and-play capability provides a safer way to use Android while in your vehicle, easily access the best of Google Maps with voice-guided navigation and Play Music, place phone calls or send and receive messages and ask Google any questions by voice command.

SAFETY & SECURITY WHERE IT MATTERS MOST: EVERYWHERE

OVER 100 STANDARD & OPTIONAL FEATURES

LANE DEPARTURE WARNING WITH LANE ASSIST

Ram 1500 can read the road. Mounted on the external mirrors, available cameras can identify road lines, determine where the vehicle is and monitor motion. Should movement onto either line be detected without use of the indicator, the system will warn the driver and apply torque to the steering wheel to correct the movement. If no action corrects the drift, Lane Keep Assist⁴ can help gently nudge the vehicle back into the lane by applying corrective steering input.

ADAPTIVE CRUISE CONTROL WITH STOP AND GO

Think cruise control that's smarter than ever. When the lanes ahead are clear, this available system maintains the set speed of travel. When traffic slows, it will automatically adjust to a safe distance selected by the driver. In certain conditions, such as stop-and-go traffic, the system is able to bring the vehicle to a complete stop without any driver intervention, then prompt the driver to press the Resume button or tap the accelerator to re-engage to safe-range speeds as traffic begins to move.

FORWARD COLLISION WARNING WITH ACTIVE BRAKING

Using radar and video sensors, this available system detects whether the vehicle is approaching a vehicle or large obstacle in its path too rapidly. When an object is detected, the system can provide audible and visual warnings and can assist the driver in avoiding the incident by actively applying the brakes. The driver can adjust the sensitivity and turn brake support on or off using the Uconnect[®]radio.

BLIND-SPOT MONITORING WITH TRAILER DETECTION

This available system utilizes sensors in the exterior mirrors to monitor the "blind spots" on each side of the vehicle. The system provides audible chimes and visual icons, informing the driver when changing lanes, passing others or being passed. The Trailer Detection feature allows the driver to select Max, Trailer Length or Auto mode, automatically detecting the trailer length and adding it into the blind-spot.

REAR-CROSS-PATH DETECTION

When in Reverse, the Rear Cross-Path Detection System detects vehicles and/or other objects that are in perpendicular relationships to your Ram truck using dual wide-band radar sensors, and notifies you using illuminated icons in the outside mirrors and driver-selected chimes.

NEW 360 SURROUND-VIEW CAMERA

Select models let you bring available 360-degree awareness to your drive. Credit the smart combination of strategically positioned sensors that work with cameras mounted in the grille, exterior mirrors and rear. In particular, the bird's-eye view offers exceptional monitoring of your ride. *Not available with trailer tow Group.

PARK ASSIST

Sophisticated sensors give the All-New Ram 1500 superb capability. Available and new for 2021: the invaluable Parallel and Perpendicular Park Assist systems, making parking manoeuvres on the street and in parking lots easier than ever. Just engage the system, and enjoy hands-off parking.

LARGEST STANDARD BRAKES IN THE SEGMENT

Confident stopping power comes from a new brake system that's large, robust and ultra-capable. The largest rotors in the segment measure 378 mm (14.9 in) in diameter, sharply reducing the 100 – 0 km/h stopping distances and helping to improve overall performance.

LED SMARTBEAM HEADLAMPS

This available advanced system provides the maximum amount of light possible, automatically switching headlamps from high- to low-beam when oncoming headlamps or forward light are sensed, or when taillamps are detected in front of the vehicle.
